- When audio data is set to [C.Fn 4-2 Audio compression: Enable] (audio: AAC recording).
- Movie recording stops when the maximum recording time per movie is reached.
- Sound is not recorded for approx. the last two frames when the compression method for movie recording quality is IPB (Standard) and the camera is set to [C.Fn 4-2 Audio compression: Enable] or IPB (Light) (audio: AAC). Moreover, the video and sound may be slightly out of sync when movies are played back in Windows.
